

Graduate Trainee- Technology

Accelerate your career with a world leader in financial trading and investments. As a member of our technology department, you will play a vital role in designing, implementing and maintaining the systems and technologies that power our operations. You will have the opportunity to work with cutting-edge technologies and contribute to a range of creative projects encompassing the full breadth of modern software engineering practices, supported by our team of expert engineers. You will collaborate with cross-functional teams spread across our London and Krakow offices.

If you are passionate about solving complex challenges by leveraging technology and are excited to contribute to a dynamic team, we encourage you to apply for this position through our campus hiring program

So, who are we?

Hello, we're IG Group. No, not Instagram – though we're a pretty big deal ourselves. We're a global, FTSE 250-listed company made up of a collection of progressive fintech brands in the world of online trading and investing. The best part? We've snapped up many awards for our top-class platforms, forward-thinking products, and incredible employee experiences. We believe in financial freedom.

And our purpose is to help ambitious people achieve it. Around 400,000 people use our ground-breaking technology and forward-thinking platforms to trade the financial products they know and love.

Did we mention we have offices in 18 countries? Yes, when you join IG Group, you'll have the chance to work across multiple brands, with people all over the world. Join us for an exciting future and let's innovate together!

Who we're looking for

You're curious about things like the client experience, the rapid developments in tech, and the complex world of fintech regulation. You're also a confident, creative thinker with a knack for innovating. We know that you know every problem has a solution. Here, you can try new ideas, and lead the way in creating inspiring experiences for our clients and everyone around you. We don't fit the corporate stereotype. If you want to work for a traditional, suit-and-tie corporate that just gives you a pay cheque at the end of the month, we might not be for you. But, if you have that IG Group energy and you can stand behind what we believe in, let's raise the bar together

What you will do

- Learn to design, implement, and manage cloud infrastructure using platforms like AWS, Azure, or Google Cloud, ensuring high availability and security
- Work on automating deployment pipelines, integrating CI/CD tools, and enhancing the overall efficiency of development processes by adopting best practices in DevSecOps.
- Find and implement smart ways to reduce the cost of development operations
- Build tools to simplify and streamline development operations

You possess:

- Strong proficiency in Programming Languages (Java, C++ , Python).
- Good understanding of fundamental concepts in Operating Systems, Database & Networks.
- Familiarity with platforms, cloud services, security principles, and incident management.
- Strong passion for finance domain and a desire to learn and grow.
- Excellent problem-solving skills and the ability to troubleshoot complex issues.
- Good analytical and problem-solving skills
- Strong communication skills and the ability to work collaboratively in a team environment.

How you'll grow

When you join IG Group, we want you to have more than a job – we want you to have a career. If you spot an opportunity, we want you to chase it. Stretch yourself, challenge your self-beliefs and go for the things you dream of. With internal and external learning opportunities, and the tools to help you skyrocket to success, we'll support you all the way.

And these opportunities truly are endless because we have some bold targets. We plan to expand our global presence, increase revenue growth, and ultimately deliver the world's best trading experience. We'd love to have you along for the ride.

The perks

As well as having the chance to attend regular social events, get funding for your charitable endeavours and join a range of special interest groups, you'll receive an attractive selection of benefits working with IG:

- * Performance-related bonuses
- * Pension, insurance and medical plans
- * Career-focused technical and leadership training
- * Contribution to gym memberships and more
- * Shift allowance, as applicable
- * Company transportation (pick up and drop) as per shift requirements.

Where you'll work

We follow a hybrid working model; we reckon it's the best of both worlds. This model also feeds into our secret ingredients for innovation: diversity, flexibility, and close connection. Plus, you'll be welcomed into a diverse and inclusive workforce with a lot of creative energy. Ask our employees what their favourite thing is about working at IG, and you'll hear an echo of 'our culture'! That's because you can come to work as your authentic self. The things that make you, you – like your ethnicity, sexual orientation, faith, age, gender identity/expression or physical capacity – can bring a fresh perspective or new skill to our business. That's why we welcome people from various walks of life; and anyone who wants to help us realize our vision and strategy. So, if you're keen to connect with our values, and lead the charge on innovation, you know what to do.
